#### Control/performance data

- V/F Control - Speed regulation
- Speed variation
- **VVW Control**
- Speed regulation - Speed variation
- Sensorless vector control
- Speed regulation
- Speed variation
- Vector control with Encoder
  - Speed regulation
  - Speed variation

### **Analog Inputs**

Quantity (standard) Levels Impedance for voltage input Impedance for current input Function Maximum allowed voltage

### **Digital inputs**

Quantity (standard) Activation Maximum low level Minimum high level Input current . Maximum input current Function Maximum allowed voltage

#### Analog outputs

Quantity (standard) Levels RL for voltage output RL for current output Function

### **Digital outputs**

Quantity (standard) Maximum voltage Maximum current Function

### Communication

- Modbus-RTU (with accessory: Any plug-in module)
- Modbus/TCP (with accessory CFW500-CEMB-
- TCP)
- Profibus DP (with accessory: CFW500-CPDP)
  Profibus DPV1 (with accessory: CFW500-CPDP)
- Profinet (with accessory CFW500-CEPN-IO)
- CANopen (with accessory: CFW500-CCAN)
- DeviceNet (with accessory: CFW500-CCAN) - EtherNet/IP (with accessory CFW500-CETH-IP)
- EtherCAT (Not available)
- BACnet (CFW500 G2 / CFW501 G2 / MW500 G2 with accessory: Any plug-in module)

- Available protection
- Output phase-phase overcurrente/Short - Overcurrent/Short circuit phase-ground
- Under/Overvoltage in power
- Heat sink overtemperature
- Motor overload
- IGBT's modules overload
- Fault/External alarm
- Programming error

## **Operation interface (HMI)**

#### Certifications

UL, CE, RCM, CS/IRAM, EAC, UKCA and RoHS CHINA

#### Notes

1) Motor power is orientative, valid for standard WEG Motors of IV poles. The correct sizing must be done according to the nominal current of the motor used, which must be less than or equal to the rated output current of the inverter;

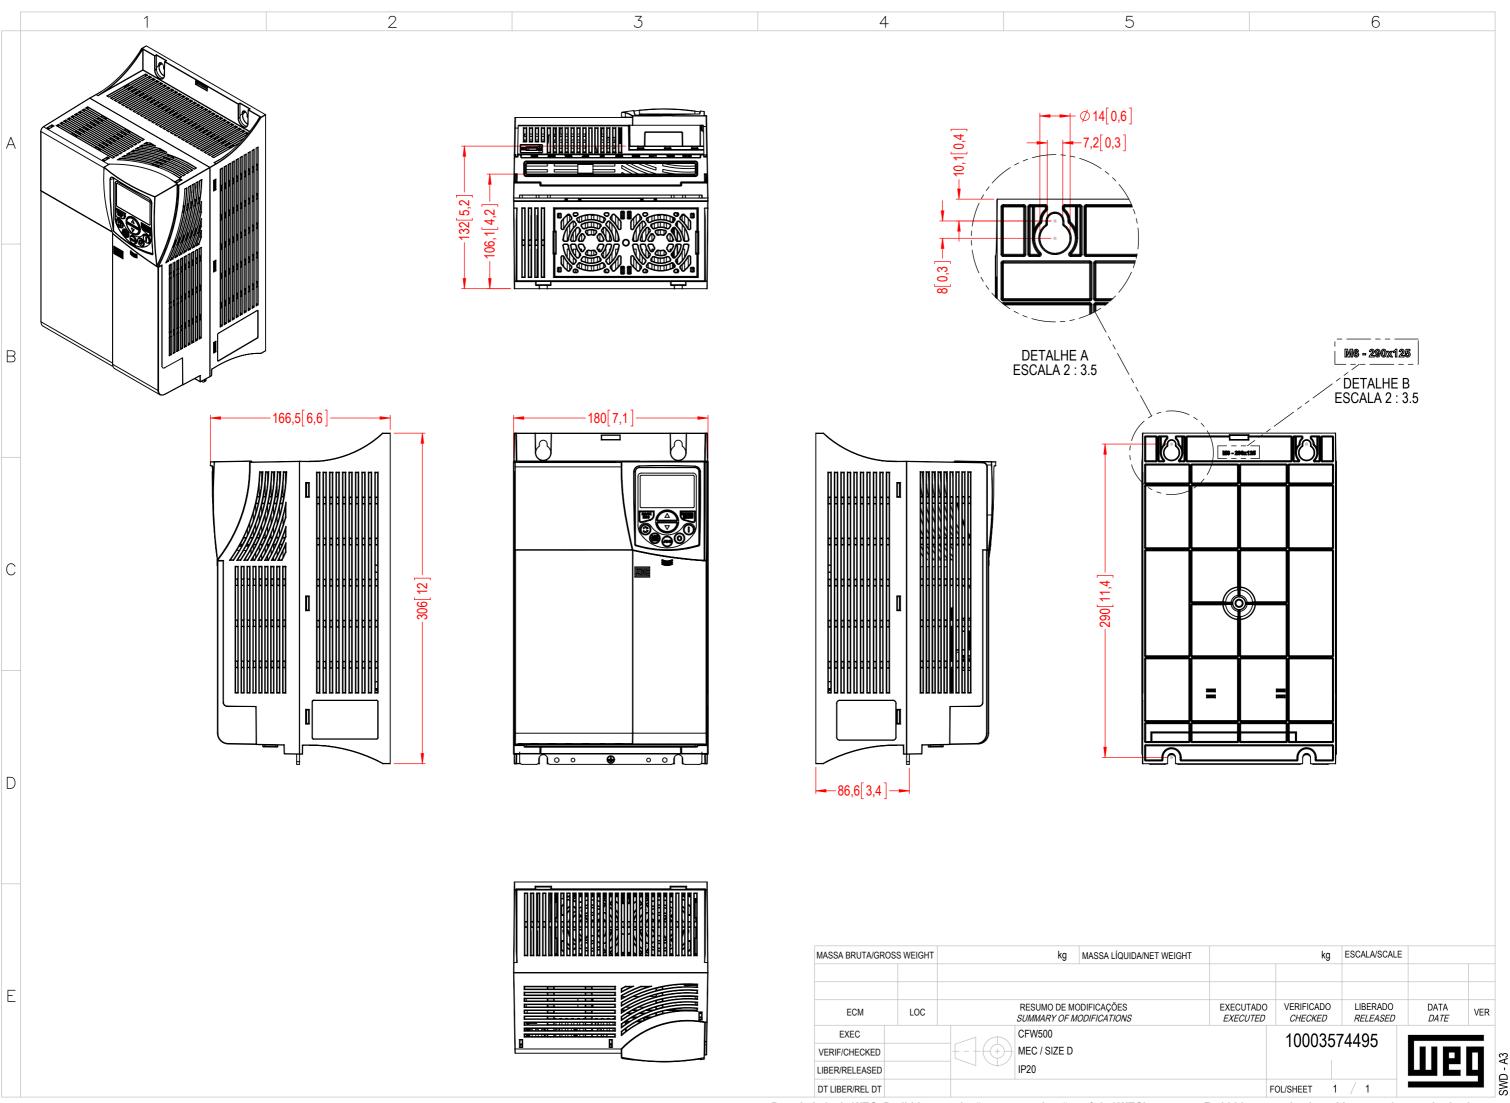

2) Braking resistor is not included;

3) Considering minimum line impedance of 1%;

4) For more information, refer to the user manual of CFW500;

5) All images are merely illustrative.

6) For operation with switching frequency above nominal, apply derating to the output current (refer to the user manual).
